[My Portfolio](#)

SUMMARY

Detail-oriented Data Analyst with hands-on experience in Python, SQL, Excel, and Power BI. Skilled at cleaning datasets, running exploratory analysis, and building dashboards that turn raw data into decisions. Seeking an analyst or intern role where I can solve real business problems, grow fast, and contribute to a data-driven team.

TECHNICAL SKILLS

Tools: SQL (PostgreSQL, MySQL), Python (Pandas, NumPy), Power BI, Excel (Pivot, Power Query), Google Sheets

Core Skills: Data cleaning & wrangling, exploratory data analysis (EDA), feature engineering, KPI tracking, dashboard design, data storytelling, stakeholder communication

PROFESSIONAL EXPERIENCE

Data Analytics Instructor (Part-time) | QwantomHub Technologies, Abuja qwantomhub.com

2025 – Present

- Deliver practical data analytics training in Python (Pandas), SQL, Excel, and Power BI to students and corporate professionals.
- Design course curricula, hands-on exercises, and real-world datasets that build end-to-end analytical skills from cleaning to dashboard delivery.
- Mentor learners through complete analytics projects, guiding them from raw data to stakeholder-ready insights.
- Simplify complex data concepts into clear, structured lessons for non-technical audiences.

Operations & Reporting Analyst (Freelance) | Self-Employed, Remote

Jan 2025 – Present

- Built and maintained Excel-based reports and interactive dashboards to track operational metrics, reducing reporting turnaround time from 3 days to 1 day.
- Cleaned raw operational data using Python (Pandas) and Excel Power Query to ensure accuracy before analysis.
- Designed interactive Power BI & Excel dashboards to track KPIs for sales, marketing, and customer engagement.
- Collaborated with non-technical stakeholders to translate data findings into actionable recommendations.

ANALYTICS PROJECTS

Customer Shopping Behaviour Analysis | Python, Pandas, Power BI (2026)

colab.research.google.com/drive/1y5mSnFqSQ_Y5O7etzXi2GX211CpXyQ45

- Analyzed 3,900+ customer records to answer 10 business questions on revenue, retention, and product performance.
- Identified that subscribed customers generate significantly higher average revenue than non-subscribers, informing retention strategy.
- Segmented customers into New, Returning, and Loyal tiers based on purchase history; revealed that Young Adults drive the highest revenue by age group.
- Compared average purchase amounts across shipping modes and flagged the top 5 discounted products with highest conversion rates.
- Built a Power BI dashboard (Customer Behaviour Dashboard) visualizing revenue by category, age group, subscription status, and gender.

Hospital Readmission Analysis | Python, Seaborn, Excel, Power BI (May 2025)

colab.research.google.com/drive/1jbaq4k1x6pTZCTXT_cKVMvpC34Fu2bTB

- Analyzed 10+ clinical variables to identify key drivers of hospital readmission using end-to-end EDA (missing values, outliers, correlations).
- Conducted statistical profiling and outlier detection using Pandas and Seaborn; created heatmaps and box plots to surface patterns in clinical data.
- Performed feature engineering and categorical encoding on medical specialty, glucose test results, and medication variables for predictive readiness.
- Built a Power BI dashboard to flag high-risk patient segments and support clinical decision-making.

Uncovering Profit Leaks in a \$742K Furniture Sales Analysis | Excel (Pivot Tables, Visualization) (July 2025)

- Analyzed furniture sales data using Pivot Tables and charts to surface revenue drivers and profitability gaps across sub-categories.
- Identified Tables (-8.5% margin) and Bookcases (-3.0%) as loss-making segments; recommended pricing and shipping adjustments to recover margins.
- Evaluated shipping performance across delivery modes, revealing efficiency gaps and supporting data-driven logistics decisions.

Customer Retention & Churn Analysis | Excel, SQL (Jan 2026)

- Queried customer behavior data with SQL to identify churn patterns, retention risks, and customer lifecycle stages.
 - Identified key churn drivers including low engagement and delayed payments; developed and presented targeted retention strategies to stakeholders.
-

EDUCATION

Obafemi Awolowo University, Ile-Ife, Osun State
Bachelor of Science Industrial Chemistry

ADDITIONAL

Collaboration: Delivered freelance projects independently with weekly async updates, recorded walkthrough videos, and live presentation calls.
